

Evaluator Training

This page lets you subscribe to the mailing list.

Play SQL includes a training package. Once a week during one month, you will receive the following tutorials. To make your investment 100% effective, it is important you develop and consolidate the adoption of the product in your company as early as possible, so training the key stakeholders is important.

- First week: Learn how to create you first spreadsheet and write totals,
- Second week: Learn 4 specific skills about SQL
- Third week: Learn advanced tips about Spreadsheets in Confluence
- Fourth week: How do others use Play SQL?

We'll also tell you when we publish new features about Play SQL.
