

Xray integration with Requirement Yogi

Since 2.3, Requirement Yogi is able to get some Xray fields from Jira and display them in the traceability matrix. This page summarizes which fields are available.

Ask for more!

We're happy to develop more fields, please just ask us detailing your usecase. We are just lacking examples and usecases to go further.

Types of links

If the Jira issue is linked to a Requirement Yogi item, then we can display it! Here are examples:

Type of Xray record	Available	Example
Requirement Test	✓	
Requirement Test Execution	✓	
Requirement Test plan	✓	<p>The test plan can display the "execution status" and the associated tests.</p>
